Princess Priscilla Lyons

Education

Doctor of Philosophy | May 2022 | University of Florida, Gainesville

- Major: Electrical & Computer Engineering, 3.52/4.00
- Research Interests: Machine Learning, Natural Language Processing, Data Analytics

Master of Science | Dec 2019 | University of Florida, Gainesville

- Major: Electrical & Computer Engineering, 3.52/4.00
- Research: Machine Learning, Image Processing, Anomaly Detection

Dual Bachelor of Science | May 2017 | University of Missouri, Columbia

- Major: Electrical Engineering, Computer Engineering, 3.16/4.00
- Minor: Spanish, Computer Science, Mathematics

Work Experience

Data Science Intern **| Lam Research Corporation | Summer 2020**

- Worked on an Industry 4.0 initiative within the Service Analytics Research and Development group to improve automatic equipment testing and analysis between field engineers and data analysts
- Developed efficient parsers to extract recommended datalog parameters used for building statistical models from numerous technical documents and export them for easier utilization for model building
- Created programs to automatically generate and filter subsystem parameter for fleet monitoring application which is being developed for Lam Flex and Kiyo Etch Chambers

Graduate Research Assistant **| University of Florida | Fall 2017 – Present**

- Conducted natural language processing research on multi-lingual datasets to analyze the effects of translation on cross-lingual authorship attribution
- Cooperated with a team of researchers from remote universities to develop an underwater environmentally adaptive target characterization and detection system
- Compared and developed unsupervised and supervised anomaly and target detection methods in synthetic aperture sonar (SAS) imagery
- Authored and presented a SPIE Defense + Commercial Sensing research paper titled, “Comparison of Prescreening Algorithms for Target Detection in Synthetic Aperture Sonar Imagery.” [1]

Software Engineering Intern **| Lockheed Martin – Space Systems Company | Summer 2016/2017**

- Collaborated with a team of software engineers on an independent research and development project
- Created C++ software tools to parse SDAS files of a switch matrix to locate errors in the hardware configuration, return all USB device names, GUIDs and paths to the user
- Designed a C++ driver to interface with a Serial I/O SIO4 board using a RS422 communication standard on a RedHawk Linux real-time operating system
- Utilized the Hardware-in-the-Loop (HWIL) technique to troubleshoot and perform successful transmissions and receptions of data with a serial I/O SIO4 board for an integrated flight simulation

Skills & Relevant Courses

- Skilled in C, C++, Java, Python, R, CUDA, OpenMP and Matlab programming languages
- Software Design, Embedded Systems and Computer Architecture, Hardware Security
- Machine Learning, Image Processing, Data Analytics and Natural Language Processing
- Fundamentals of Biometric Identification
- Advanced conversational Spanish

Honors, Leadership & Activities

- GEM Full Science Fellow 2020
- Univ. of Florida Graduate Research Assistantship Award
- Univ. of Florida ECE Ambassador (2020 – Present)
- Univ. of Missouri, Celebration of Women in Engineering Honoree 2016
- Univ. of Missouri Dean’s Lists (Fall 2014, 2016)
- Mizzou IEEE Secretary (2015 – 2016)
- Mizzou IEEE Treasurer (2016 – 2017)
- Univ. of Missouri Engineering Ambassador (2014 – 2015)
- Griffiths Leadership Society of Women (2014 – Present)
- National Society of Black Engineers (2012 – Present)
